- TELUS Spark Brainasium Playground and Science Centre

Tour Includes:

- Private coach transportation with professional driver, tour and background information from hosting organizations, admission to TELUS Spark

Tour Excludes:

- Food or beverage, items of personal nature

Join us for a full-day of playgrounds and parks! We will visit Haysboro Community Natural Playground to learn how the community created a hub where families can play together and children can explore nature. At East Village and St. Patrick's Island, we'll see a blend of natural and traditional playground elements, as well as a playspace integrated with a community garden, all close to city centre. Prairie Winds Park is a newly redeveloped City of Calgary park with an urban playscape. Lastly we'll visit TELUS Spark Science Centre's Brainasium – an amazing playground with a 66-foot long slide, logjam, and giant molecules. There will be free time to explore the rest of the Science Centre. You'll get behind-the-scenes information about how each playground was designed as well as have time to play (kids more than welcome!). There will be opportunities to buy snacks and lunch at East Village and TELUS Spark.
