THE DECLINE OF PLAY, AND MENTAL HEALTH CONSEQUENCES OF THAT DECLINE

I. The Decline of Play
- What do I mean by play? Activity that is (1) self-chosen & self-directed; (2) intrinsically motivated; (3) guided by mental concepts; & (4) imaginative.
- Historical & social science evidence for huge decline in play over 60 years, in US and elsewhere.
- My observations of play’s decline, from 1950s to today.
- Some reasons for the decline: Spread of fears; weight of school; schoolish view of child development.

II. Psychological Consequences of the Decline of Play (and reasons for thinking they are consequences)

A. Increased depression, anxiety, and suicides in young people.
- Five- to 8-fold increase in Major Depression and anxiety disorders in young people, based on estimates from the MMPI and Taylor’s Manifest Anxiety Scale, since the 1950s. Rise in suicides.
- A world without play is depressing and anxiety-provoking.
- How children learn to control fear in play.
- Play deprivation experiments with monkeys & rats.

B. Decline in young people’s sense of control over their lives.
- Continuous decline in “internal locus of control,” based on standard assessments.
- A causal relationship: Decline in play → loss of sense of control → depression and anxiety.

C. Decline in empathy and rise in narcissism in young people
- At least since late 1970s, based on Narcissistic Personality Inventory & Interpersonal Reactivity Index.
- How children overcome narcissism and acquire empathy in play.

D. Decline in creativity among US school children at all grade levels
- Since 1984, based on Torrance Tests of Creative Thinking.
- Why the increase in academic training and decline in play would reduce creativity.

Sept. 15 Plenary: HOW TO RESTORE CHILDREN’S PLAY IN TODAY’S WORLD

A. At the individual and family level: See Lenore Skenazy’s Free Range Kids. Examine our own values (what do we really want for our children?). Examine our own fears (how rational are they?). Be brave, and let our children be brave.

B. At the neighborhood level: See Mike Lanza’s Playborhood. Create neighborhood play opportunities.

C. At the community level: Schools as places to play; supervisors in parks; adventure playgrounds.
